Salvador Muro

# Game Summary

Anghonia Frontier is a mythic, high-action war simulation set on the planet of Anghonia, where twelve Anghonian factions battle in the ceremonial “Grand Festival of the Almighty” to prove their closeness to the True Path. Each faction is led by a legendary B’thelum and supported by skilled Xiohs and frontline Pallons, all empowered by divine principles that shape their combat styles and transformations. Players join massive 50v50 battles—blending heroic fantasy, sci-fi warfare, and anime-influenced spectacle—where objectives shift dynamically and every encounter tests a warrior’s True Resolve. With randomized objectives tied to divine trials, cinematic large-scale combat, and fluid class-based gameplay, every match tells a unique war story where any player can turn the tide of battle and lead their faction to victory.

## Hook:

A massive, evolving faction war where every action shifts the fate of the battlefield.

## Game Design Pillars

### Pillar 1 — Survival of the Fittest

Players grow stronger the longer they remain active on the battlefield without being defeated. Every action (defeating enemies, contributing to objectives, assisting allies, and surviving intense engagements) feeds into a **Resolve Meter** that represents their rising True Resolve. As this meter increases, players unlock evolved versions of their abilities and heightened combat potential. Upon reaching maximum Resolve, players gain access to a powerful **Ultimate Technique**, a unique expression of their Divine Principle that alters the environment and shifts battlefield momentum. This pillar rewards smart aggression, careful survival, and strategic timing, allowing every player to scale their impact as the match intensifies.

### Pillar 2 — Divine Principles

Each Anghonian warrior embodies a combination of spiritual forces through their **Divine Principle (main)** and their **Principle (sub-attribute)**. These represent philosophical virtues and abstract cosmic ideals (such as *Domination*, *Justice*, *Infinity*, *Subjugation*, *Destruction*, *Creation*, and others), creating a deep and flexible combat identity system. The Divine Principle defines a player’s core fighting style, movement dynamics, and weapon behavior, while the secondary Principle shapes their specific abilities and utility options. With 22 Principles planned at launch and more to come, this system enables highly personalized builds, expressive playstyles, and limitless combinations that empower players to craft the warrior they want to be.

### **Pillar 3 — Role Switch**

Anghonia's hierarchy is central to battlefield strategy. Matches begin with most players as **Pallons (standard fighters)**, while high-performing individuals may ascend to **Xiohs (elite warriors)** or even **B'thelums (faction leaders)** based on the evolving flow of the war. The first promotion is granted to the kill leader; subsequent promotions rotate through the team so every player has an opportunity to influence the match.

- **Xiohs:** When defeated, they respawn as Pallons, and the next eligible player rises into the Xioh role.
- **B'thelums:** Appear at the mid-match "peak" phase, either when half the faction's lives remain or when half the objectives are completed. B'thelums always return after a cooldown, if defeated, ensuring their presence shapes the climax of the battle.

This pillar turns rank into an evolving, player-driven system that introduces dramatic shifts in power and battlefield tempo. It reinforces teamwork, balances high-impact roles, and ensures every match is dynamic, cinematic, and unpredictable.

## **User Experiences**

### **Awe, Power, and Spiritual Awakening**

Players should feel a sense of rising spiritual energy and cinematic wonder throughout every battle. The game emphasizes moments where Anghonians unlock new depths of their True Resolve, making players feel as though they are awakening to a greater cosmic purpose.

### **God-Like Empowerment Through Resolve**

When a player reaches full Resolve and activates their evolved forms or Ultimate Techniques, the moment should feel explosive, divine, and overwhelming, like unleashing a God-tier transformation that shifts the battlefield in their favor.

### **Dynamic Tactical Reaction to Objectives**

Whenever objectives change or evolve mid-match, players should feel the urge to adapt quickly and rethink strategies, experiencing a tactical "we need to pivot now" urgency that drives team coordination.

### **Anxiety and Excitement When B'thelums Arrive**

The arrival of a B'thelum should feel like a raid boss stepping into the war, a moment where both teams snap into focus. Their presence should generate tension, spectacle, and the sense that destiny itself has entered the battlefield.

### **Hope, Comebacks, and Last Stands**

When a team is behind, the game encourages hope by enabling powerful comeback moments through role switching, Resolve surges, and objective reversals. But if players are on their final stand, it should feel cinematic; a heroic last effort to seize victory.

### **Momentum and Pressure When Winning**

A team that gains the upper hand should feel the force of momentum behind them, along with a sense of pride in their synergy. But when a powerful enemy disrupts their lead, they should feel pressure to refocus and secure the final blow.

**Match Completion: “I Mattered in This War.”**

After every match, players should walk away thinking:

**“That was epic—and I made a difference.”**

Regardless of role, players should feel that their actions influenced the flow of the battle and left an imprint on the match’s final story.

**Accessible Entry, High-Skill Ceiling**

New players should feel welcomed by clear tutorials, guided systems, and spectacular visuals that motivate them to learn. Meanwhile, veterans should feel a deep sense of mastery, creativity, and expressive combat freedom, ensuring long-term replayability.

**First Match Experience**

New players should feel excited by the spectacle of massive war, motivated to improve, and inspired by the creative potential of Divine Principles and transformations.

**Veteran Experience**

Experienced players should enjoy a powerful sense of mastery; fluid combos, perfect timing, high Resolve management, and complete control over their custom-built warrior. Their 100th match should still feel fresh, expressive, and strategically fulfilling.

# Core Gameplay

## Aim of the Game

The aim of each match in **Anghonia Frontier** is to lead your faction to victory through a dynamic tug-of-war warfront where both sides fight to drain the enemy's life reserves or complete all objectives before the opposing faction. Players must battle across shifting frontlines, build their True Resolve, and strategically transform at key moments to push momentum in their favor. With long-form, cinematic matches lasting up to an hour and the potential for shorter 30–45 minute victories if one side dominates; the ultimate goal is to combine combat mastery, tactical objective play, and empowered transformations to bring honor to your faction in the Grand Festival.

## Core Gameplay Summary

Anghonia Frontier delivers fast, fluid, anime-inspired combat built around mobility, weapon mastery, and Divine Principle–driven abilities. Players battle on foot or in the sky depending on their chosen Principles, with full access to environmental traversal such as gliding, dashes, rapid movement bursts, and aerial maneuvers. The core loop is centered on fighting, building Resolve, capturing objectives, transforming into stronger forms, and using that power spike to push the frontline.

Objective completion grants buffs related to True Resolve, unlocks new routes through the environment, and reshapes the battlefield, especially when B'thelums appear and alter terrain through immense divine influence. Squad teamwork is essential for maintaining momentum, coordinating pushes, and creating space for allies to reach their peak Resolve states. Every match is a cinematic war where a single warrior can rise from Pallon to Xioh and eventually prove themselves worthy in the eyes of the 12 B'thelums.

# Game Design Goals

## **Deliver Cinematic, Large-Scale, Expressive Warfare**

Anghonia Frontier aims to combine massive, high-action 50v50 warfronts with fluid anime-inspired combat, deep customization, and meaningful player impact. Every match should feel like a legendary battle where mobility, weapons, Divine Principles, and teamwork all blend into a cohesive, cinematic experience.

---

## **Seamless Multi-Phase Objective Flow**

A core mechanical goal is ensuring that the evolving, multi-phase objectives progress smoothly and intuitively—even during chaotic large-scale combat. Objectives should naturally escalate tension, shift strategies, and reinforce the tug-of-war structure without causing confusion or downtime. The battlefield must always move forward.

---

## **Encourage Creative Build Experimentation**

Players should feel excited to mix, experiment, and refine builds through combinations of Divine Principles and Principles. Every match should give players new ideas for playstyles, transformations, and high-skill expression. Creativity and experimentation must remain central to the enjoyment of the game.

---

## **Asymmetric Identity, Balanced Fairness**

The 12 factions should carry distinct thematic identities and subtle mechanical differences inspired by their B'thelums and Divine Principles. While asymmetry creates flavor, fairness must always be preserved. No faction should dominate the meta; each should feel viable, iconic, and true to its lore.

---

## **Long-Term Mastery Through Evolution and Principles**

Progression focuses on mastering Divine Principles and unlocking new forms, evolutions, and transformations tied to True Resolve. Long-term engagement should come from deepening one's understanding of their combat identity, not from simple stat grinding. Every new evolution should feel earned, meaningful, and lore-consistent.

---

## Clear Direction for Future Updates

Ongoing development will prioritize:

- **New Divine Principles** that expand the roster of philosophical and combat identities
- **New maps and warfronts** that broaden the scope of the Grand Festival of the Almighty
- **New objective types** that reshape the tug-of-war dynamic
- **Balancing improvements and systemic refinements**, including new mobility or combat layers as needed

The game should feel alive, expanding, and evolving alongside its player community.

---

## Non-Negotiable Core Values

Anghonia Frontier must never compromise on:

- **Identity of the Divine Principles** — the heart of player expression, lore, and combat
- **Combat fluidity** — fast, responsive, expressive movement and abilities

These two pillars define the soul of the game, and all design decisions must support them.

# Game World

## A. Planet Overview — Anghonia

Anghonia is a vast, mythic world shaped by spiritual philosophy, disciplined combat traditions, and the cosmic pursuit of the True Path. Its landscapes shift dramatically from region to region—some bright and mystical, others harsh, ancient, or infused with divine architecture. Depending on the battlefield, environments may reflect high-tech mysticism, grand natural wonders, or war-scarred lands forged by the extraordinary power of Anghonians.

The planet is divided into **twelve continents**, each ruled by one of the twelve factions participating in the Grand Festival of the Almighty.

---

## B. Continents & Biomes

Each of the twelve continents features a distinct biome and thematic identity. These may include combinations of:

- **Desert Wastelands** enhanced by ancient ruins
- **Crystal Forests** that refract ambient energy
- **Floating Islands** suspended by ancient Anghonian temples
- **Volcanic or molten regions** shaped by intense combat training
- **Frozen Tundras** where resolve is tested by nature itself
- **High-tech divine cities** blending spiritual aesthetics with advanced technology
- **Sacred mountain regions** where shrines overlook battlefields
- **Living forests** affected by past B'thelum influence

Each continent's identity affects architecture, clothing, combat philosophy, and battlefield layouts.

---

## C. Factions & Their Identity

Each of the **12 factions** controls one continent and is defined primarily by two cultural pillars:

### • Combat Style

Every faction trains differently, emphasizing speed, discipline, power, spiritual focus, or utility depending on their philosophy.

### • Philosophy

Each faction interprets the True Path uniquely, shaping their rituals, teachings, and fighting approach.

## Divine Principles & Factions

Players are **not restricted** by faction when choosing Principles. Any Anghonian can embody any of the 22 Divine Principles and sub-principles, allowing full creative freedom in combat builds.

---

## D. The B'thelums and Xiohs

### B'thelums

The twelve B'thelums are the greatest warriors and spiritual leaders of Anghonia.

Their relationship with Divine Principles includes:

- **One B'thelum was born as the Divine Principle itself**, an unparalleled prodigy who needs no invocation.
- **The remaining eleven fully developed their Principles through mastery**, becoming true embodiments.

B'thelums are living legends—displaying transformational power, divine combat techniques, battlefield-altering influence, and total mastery over their Principles.

### Xiohs

Xiohs are apprentices chosen by each B'thelum, training directly under them through combat trials and philosophical instruction. They are next in line to embody Principles and serve as elite warriors on the battlefield.

---

## E. Lore & Culture of Anghonia

### The True Path

All Anghonians are born with an innate understanding of the True Path—a metaphysical direction representing the ideal way to act, think, train, and evolve. Following the True Path leads one closer to spiritual perfection and ultimate combat mastery.

### True Resolve

True Resolve reflects an Anghonian's commitment to the True Path.

As an individual gathers Resolve through action, discipline, and purpose, they draw closer to embodying their Principle fully.

Resolve is both a philosophical and literal force, used to transform the battlefield and one's own abilities.

---

### The Grand Festival of the Almighty

The Grand Festival is the ultimate test of Resolve—a ceremonial war conducted among the twelve factions to determine:

- Which faction demonstrates the highest spiritual discipline
- Which individuals are closest to the True Path
- Who can be trusted with leadership in guiding Anghonia's future

It is not simply a competition—it is a **world-defining event**, shaping political influence, spiritual authority, and combat hierarchy across the planet.

---

## F. Culture & Daily Life

Outside of the Festival, Anghonia is a generally peaceful world, but highly competitive and disciplined. Daily life includes:

- **Philosophical study of the True Path**
- **Continuous training through combat trials**
- **Apprenticeship under Xiohs and B'thelums**
- **Spiritual ceremonies and divine celebrations**
- **City-states built around temples, arenas, and shrines**

Anghonians live in harmony but constantly push themselves toward greater strength.

---

## G. Threats & Wildlife

While peaceful culturally, the world is dangerous due to:

- **Powerful monsters** attracted to Anghonian energy
- **Dimensional anomalies**
- **Beings from other worlds or planes** who seek to challenge Anghonians

These foes act as environmental threats and narrative hooks.

---

## H. Divine Principles in the Environment

Divine Principles **do not naturally affect the world** on their own.

Only a B'thelum can manifest their Principle in nature—causing storms, terrain shifts, floating structures, or divine manifestations during combat.

This reinforces the immense spiritual power and narrative importance of B'thelums.

---

## I. Visual & Aesthetic Direction

The visual direction draws inspiration from **Honkai: Star Rail**:

- High-detail anime realism
- Stylized but polished character art
- Dynamic combat effects
- Bright, divine color palettes
- Highly thematic continent palettes (e.g., crimson deserts, teal floating islands, lavender crystal forests)

The visual identity aims to blend **mythic fantasy**, **anime flair**, and **divine sci-fi** into a cohesive world.

---

## **J. Major Landmarks**

Anghonia features monumental sites such as:

- **The Divine Spire**
- **The Twelve Temples of the Principles**
- **The Grand Festival Arena**
- **The Origin Rift** (dimensional anomalies)
- **Massive statues of the Twelve B'thelums**
- **Sacred shrines used during objective phases**

These landmarks act as narrative anchors and potential battlefield locations.

## Characters

### **A. PALLONS (Base Role - Standard Anghonian Warriors)**

Pallons represent the average combat-ready Anghonian—warriors trained from birth through spiritual discipline and relentless physical conditioning. Every adult Anghonian is considered Pallon-tier by default, capable of handling most threats across Anghonia.

#### **Role Identity**

- Base player role in multiplayer
- Standard fighters entering the battlefield
- High scaling potential via Resolve
- Modular skill expression depending on Divine Principles
- Strong in groups, balanced individually
- Serve as the “foundation tier” for all Anghonian combatants

#### **Combat Expectations**

- Able to defeat regular monsters reliably
- Struggles against miniboss-level creatures alone

- Gains combat potential quickly through Resolve mechanics

#### **Customization**

Pallons are semi-customizable:

- Faction-themed armor sets
- Color schemes tied to their continent
- Style presets based on cultural identity
- Basic facial selections or presets
- Restricted cosmetics compared to Xiohs

The goal is to represent the common warrior aesthetic while still showing faction identity.

---

### **B. XIOHS (Elite Warriors - Apprentices of the B'thelums)**

Xiohs are elite Anghonian fighters personally trained by the B'thelums. They embody partial mastery of Divine Principles and demonstrate refined combat artistry.

#### **Role Identity**

- Apprentices to the B'thelums
- Represent advanced understanding of Divine Principles
- Intensively trained in complex combos and aerial combat
- Serve as high-impact roles in matches

- Bridge the power gap between Pallons and B'thelums

### **Combat Expectations**

- Significantly stronger than Pallons
- Capable of defeating dragon-tier creatures with some effort

Players can express their identity, lineage, and Divine Principle mastery freely through their Xioh.

## **C. B'THELUMS (Faction Leaders - Divine Mastery Embodied)**

The B'thelums are the pinnacle of Anghonian potential; warriors who have attained true mastery over their Divine Principle. Their presence on the battlefield shapes terrain, alters weather, and demands the attention of entire enemy factions.

### **Role Identity**

- Legendary figures leading each continent
- Embody their Divine Principle fully
- One B'thelum is *born* as the Principle itself
- Others achieved embodiment through complete mastery
- Philosophical leaders and combat paragons

### **Combat Expectations**

- Raid boss-tier entities
- Require full enemy faction coordination to defeat
- Overwhelming force when unopposed
- Serve as phase-defining characters in battle
- Possess unique movement abilities, terrain-changing ultimates, and special combo trees

### **Visual Identity**

B'thelums express their Principle through:

- Divine aura manifestations

- Elemental or philosophical particle effects
- Armor that shifts or transforms
- Materializing or evolving weapons
- Floating mantles, halos, wings, or ethereal appendages
- Environmental expression: terrain cracks, storms, field distortions

Their appearance varies based on Divine Principle and can be humanoid or partially transcendent depending on their nature.

---

## **D. Divine Principles & Player Expression**

### **Principle Percentage Expression**

- 85% Main Divine Principle determines primary visual & combat identity
- 15% Sub Principle modifies visuals mildly and influences abilities

### **Visual Influence**

Principles affect:

- Idle stance
- Running posture
- Weapon stance
- Combo motion arcs
- Auras/trails
- Transformation silhouette
- Color palettes
- Animation accents

### **Ability Visuals**

Two players with the exact same principle combination will look similar, but:

- Enemy players appear slightly darker/more contrasted to differentiate
- Unique combinations naturally lead to distinct visuals
- Transformation forms amplify Principle expression dramatically

This ensures clarity, readability, and expressive uniqueness.

---

## **E. Player Customization (General System)**

Players can customize:

- Facial features (Xiohs fully, Pallons partially)
- Hair, markings, aesthetics
- Armor sets & cosmetics
- Titles
- Weapon forms (Principle-dependent)
- Animation packs (unlockable)

Customization reflects both faction culture and Divine Principle identity.

---

## **F. Character Personality & Behavioral Influence**

### **Principle-Shaped Personality**

The chosen Divine Principle influences:

- Personality expression during emotes
- Combat stance attitude
- Voice line style (if applicable)
- Transformation demeanor
- Idle behavior

E.g.:

- *Subjugation*: oppressive, aggressive stance
- *Justice*: calm, upright stance
- *Infinity*: ethereal, loose-flowing animation style

### **Player Path Tracking**

Anghonia Frontier tracks a player's "Path Style" purely as narrative flavor:

- Aggression
- Defense
- Team support
- Objective-focused
- High mobility
- Kill-chasing
- Strategic playmaker

These can be reflected in:

- End-of-match summaries
- Titles or badges
- Lore progression
- Character demeanor

This system enhances immersion without affecting balance.

# Enemies (if applicable)

## A. World Enemies Overview

Anghonia is filled with powerful creatures, anomalies, and divine constructs that coexist alongside its warrior population. Although the world is normally peaceful, the immense spiritual energy emitted by Anghonians—and the chaos of the Grand Festival—attracts dangerous entities from both within Anghonia and beyond.

### Enemy Categories

The following enemy types exist across the world:

- **Beasts** (feral creatures mutated by ancient energy)
- **Elemental creatures** (fire-beasts, crystal serpents, storm-born avians)
- **Natural giants** (massive fauna, ancient titans)
- **Divine constructs** (animated statues, guardian relics)
- **Aberrations from anomalies** (dimension-warped beings)
- **Mechanical constructs** (high-tech sentinels from forgotten eras)
- **Outer-reality beings** (non-humanoid entities emerging from anomalies)

Excluded enemy types (for launch):

- Humanoid outsiders
- Demonic/hellish entities
- Purely ethereal/spectral beings
- These creatures primarily appear **near objectives**, ensuring that PvE elements support and shape the flow of PvP combat without overwhelming it.

---

## B. Enemy Influence & Divine Principles

Enemies are **not naturally influenced by Divine Principles** unless a B'thelum intentionally alters the battlefield.

This preserves clarity and prevents chaos during massive fights.

However:

- Divine constructs may resonate with Principle energy
- World bosses may enter altered forms under specific conditions

---

## C. Enemy Power Tiers

Enemies follow a clear hierarchical structure:

### 1. Minions

Basic creatures

Threatening in groups

Common around objectives

### 2. Elites

Stronger natural predators or minor constructs

Can threaten isolated Pallons

Reward players with small boosts (non-Resolve)

### 3. Minibosses

One tier below dragon-level

Require squads (groups of Pallons) to defeat reliably

Common during high-pressure objectives

Can disrupt team momentum

### 4. World Bosses

Dragon-level or equivalent

Require Xioh-level players or coordinated Pallon squads

Feature multi-phase combat

Often appear as phase finales or rare map events

### Future Tier (Post-launch)

**Raid-Level Threats** (not planned for base game)

---

## D. Transformations & Enemy Growth

Most enemies **do not use Resolve**, but:

World bosses may **transform** based on health thresholds or anomaly triggers

Transformations are **multi-phase**, altering movesets and behavior

The mechanic used is **distinct from Resolve**, maintaining gameplay clarity

---

## E. Anomalies & Outer-Reality Threats

### Anomalies

Anomalies are tears, distortions, or breaches connected to foreign realities. They manifest as:

- Dimensional cracks
- Reality-warped zones
- Areas where physics becomes unstable
- Divine Principle overflow points
- Enemies spawned from anomalies:
- Are aggressive to both factions
- Do not follow typical behavior patterns
- Can warp, distort, or split attacks
- Feature unique abilities and animations

These encounters are **unpredictable** and serve as wild-card threats during key objectives.

---

## F. Outsiders (Not Base Game)

While not introduced at launch, beings from other worlds are planned for the future.

These can include:

- Alien fauna
  - Divine visitors
  - Dimensional elementals
  - Tactile aberrations
  - They will be used in expansions, not the core release.
- 

## G. Anghonian PvE Enemies

Anghonians do **not** fight other Anghonians in PvE scenarios.

The world's conflicts between factions remain strictly **PvP**, while PvE enemies serve as environmental obstacles.

---

## H. Boss Design

### Minibosses

Typically:

- Large beasts
- Aberrant dimensional mutants
- Divine constructs guarding shrines
- One tier below dragon-level
- Appear during mid-phase objectives

### World Bosses

Often:

- Dragon-level elemental creatures
- Gigantic titans tied to their biome
- Dimension-warped outsiders
- Ancient guardian constructs

### Boss Fights Feature:

- Multi-phase battles
- Terrain shifts
- Abilities evolving across phases
- Unique attack patterns
- Objective-linked rewards

All world bosses have **appearance indicators**, but no cinematic intro to avoid pacing issues.

---

## **I. Enemy AI Behavior**

Enemy AI varies based on type:

### **Territorial Defenders**

- Defend objective areas
- Hold positions aggressively
- Attack anyone entering their domain

### **Anomaly Berserkers**

- Randomly roam
- Highly unpredictable
- Target both sides
- Exhibit relentless aggression

### **Higher-Tier Tactical Units**

- World bosses and elite constructs
- Analyze threats
- Change target priority
- Counter specific movement or attack patterns
- This adds depth and variety to encounters.

---

## **J. Visual & Thematic Expression**

Enemies visually match the biome and region they inhabit:

- Crystal wolves in crystal forests
- Flame serpents in volcanic zones
- Ice leviathans in tundras
- Sand burrowers in deserts

Anomaly creatures are:

- Glitchy
  - Corrupted
  - Asymmetrical
  - Feature dimensional distortions
  - Have chaotic, non-natural motion patterns
  - Enemy visuals should appear mystical, powerful, and coherent with the a flexible art direction.
-

## K. Gameplay Function

Enemies play a defined role in match structure:

- Guard specific objectives
  - Add tension during objective pushes
  - Require squads to clear efficiently
  - Prevent lone-wolf strategies
  - Create environmental pressure
  - Make matches feel dynamic and alive
  - Are never purely random; they serve the battle flow
  - They remain concentrated around **key objective areas**.
- 

## L. Signature Monsters: Phoenix Variants

Phoenixes are iconic creatures of Anghonia and appear **toward the end of matches** as divine omens.

### Phoenix Features

- Multiple elemental or Principle-inspired variants
- Highly mobile aerial combat encounters
- Serve as dramatic late-game threats
- Can force both factions to adapt strategy
- Protect final objectives or act as rare world bosses
- Phoenixes reinforce the spiritual nature of the Grand Festival's climax.

# Levels

## A. Map Scale & Layout

### Massive Multi-Zone Landscapes

Each battlefield is a **continent-scale environment** divided into multiple combat zones.

These zones include:

- **Ground-based warfronts**
- **Vertical transition areas** (cliffs, temples, floating platforms)
- **Aerial combat zones** for Divine Principle–based flight and traversal

Maps are designed for **50v50 warfare**, extreme mobility, and destructions that reshape traversal.

### Phase-Based Unlocking

To support performance and pacing:

- Maps **unlock gradually phase by phase**
- Previous zones are **sealed off** to reduce memory load
- Certain routes open or close based on objective progress
- Terrain may shift depending on B'thelum presence

This maintains a cinematic flow while balancing the tug-of-war progression.

### Aerial Zones

Aerial spaces vary in intensity:

- **Hotspots** for aerial duels
- **Open sky fields** used for traversal
- **Floating objectives or shrines** in advanced phases

---

## B. Map Themes (Biomes)

The launch version will include all core continent biomes:

- **Desert Continent** (sandstorms, ruins, scorched stone)
- **Crystal Forest Continent** (fractals, reflective surfaces)
- **Volcanic Continent** (lava rivers, burning skies)
- **Frozen Tundra Continent** (ice cliffs, frozen leviathans)
- **Floating Island Continent** (sky bridges, gravity wells)
- **Techno-Divine City Continent** (ancient-meets-futuristic architecture)
- **Temple/Ruin Continent** (holy shrines, colossal monuments)

### Faction Influence

Maps reflect minimal faction influence **until** the B'thelum arrives.

Once present:

- Terrain shifts
- Weather changes
- Color palettes adjust
- Environmental hazards may appear

- Divine markers manifest

The battlefield becomes a **living extension of the B'thelum's philosophy**.

---

## C. Objective Design

### Objective Structure

Each match consists of **7 total phases**:

- **Phase 1 — Neutral Phase**
- **Phases 2–4 — Faction A's phases (3 phases)**
- **Phases 5–7 — Faction B's phases (3 phases)**

Each faction's three phases escalate in difficulty.

### Per-Phase Objective Counts

- **3 mixed objectives + 1 large objective** per normal phase
- **5 mixed objectives + 2 large objectives** in the final faction phase
- Objectives scale in difficulty, enemy count, and strategic importance

### Objective Randomization

- Player-driven influence with small randomized variants to prevent metas
- Objectives flip depending on tug-of-war momentum
- Early objectives define frontline control
- Late objectives define faction dominance

### Possible Sub-Challenges

- Miniboss guards
  - Anomaly hazard zones
  - Temporary sky-phase objectives
  - Traversal route unlocks
  - Divine shrine activation for Resolve buffs
- 

## D. Match Flow & Phase Transitions

### 7-Phase Match Structure

#### Phase 1: Neutral Phase

- Both teams compete for initial dominance
- Early objectives determine starting momentum
- Map layout partially sealed until Phase 2

#### Phase 2–4: Faction A's Phase Sequence

- Tug-of-war determines whether Faction A pushes or defends
- B'thelums may appear **after Phase 3** if the halfway mark is reached

#### Phase 5–7: Faction B's Phase Sequence

- Mirror progression for the opposing faction
- Final phase reserved for ultimate objectives and Phoenix encounters

### Halfway Mark

The halfway point occurs when:

- First objective sets are completed **AND/OR**
- Half the faction's life pool is consumed

This triggers:

- **B'thelum arrival**
- Map-wide visual changes
- Escalated environmental destruction

### **Final Phase Trigger**

- All final objectives unlock
- **Phoenixes spawn** as divine end-phase threats
- Global battle music and visual cues intensify

## **E. Endgame Mechanics**

### **Win Conditions**

Both are equally emphasized:

1. **Reduce enemy lives to 0**
2. **Complete all objectives first**

Teams may win through superior combat or superior coordination.

### **Final Phase Enhancements**

- Resolve efficiency increases (players transform more often)
- Transformations last slightly longer
- Phoenixes disrupt both sides
- Environmental volatility increases
- Destruction becomes more global and aggressive

### **B'thelum Death Rules**

- Losing faction's B'thelum **respawns faster**
- They respawn in an **enhanced physical state**, reinforcing hope
- Winning faction's B'thelum retains normal cooldown

### **Comeback Systems**

If a losing faction defeats a Xioh or B'thelum:

- The killer and their squad gain temporary stat boosts
- Encourages targeted strikes against elite roles

## **F. Environmental Destruction**

### **Scope of Destruction**

The map is **nearly fully destructible**:

- Buildings collapse
- Crystal forests shatter
- Stone cliffs fragment
- Floating platforms crumble
- Surface-level ground can crater

- Environmental hazards may form

Deep terrain destruction is visually simulated through craters to avoid performance issues.

### **Global Destruction**

Destruction is **global**, not localized:

- B'thelum ultimates reshape the map
  - Final-phase chaos affects the full continent
  - Phoenix appearances escalate destruction further
- 

### **G. Dynamic Events & Cinematic Moments**

Maps may include:

- Elemental storms
- Meteor showers
- Divine light pulses
- Anomaly eruptions
- Earthquakes
- Floating island realignments
- Crystalline growth bursts

These events add unpredictability and realism to large-scale warfare.

### **B'thelum Ultimates**

- Cause **global effects**
- Change lighting, terrain, and atmospheric conditions
- Signal faction advantage or comeback potential

### **Match Announcers**

Narration shifts dynamically:

- **Xioh announcers** during early/mid phases
- **B'thelum announcer** takes over when present
- Calm → intense VO progression as match escalates
