

Salvador Muro

Jurupa Valley, CA 92509 | (951) 447-3478 | 22smuro@gmail.com | [My Portfolio](#)

OBJECTIVE

Innovative, dedicated, and meticulous professional in Computer Systems seeking beneficial employment in the field of Game/App Development to increase my technical skills and creativity in a collaborative team environment. Passionate about building immersive gameplay experiences and optimizing game systems.

FELLOWSHIP

AI Training & Data Annotation (Confidential Project)

Handshake - AI Research Fellowship

Remote · December 2025 – Present

- Support AI research teams by evaluating model outputs and providing high-quality annotations across text, audio, and visual formats.
- Develop clear, structured feedback and prompts to improve model reasoning, accuracy, and consistency.
- Maintain required quality benchmarks while following strict confidentiality and data-handling protocols.
- Analyze AI behavior, identify failure cases, and document improvement opportunities without disclosing proprietary details.
- Collaborate asynchronously within a distributed research environment, adapting to evolving task requirements.

EXPERIENCE

Gametester.gg — Game Tester (Freelance)

Remote | 2024 – Present

- Strengthened attention to detail and understanding of QA workflows
- Tested pre-release games; evaluated balance, UI clarity, difficulty, and stability.
- Reported bugs and performance issues through structured QA processes.

TECHNICAL SKILLS

Game Engines: Unity (2D/3D), Unreal Engine

Programming/Frontend&Backend: C#, C++, JavaScript, HTML, CSS, MySQL, nodeJS, ExpressJS

Game Dev Skills: Gameplay programming, AI behavior, game logic, state machines, level design, NavMesh, animation controllers, scriptable objects

Tools: Git/GitHub, Unity Editor, Visual Studio, Blender, Trello

Certifications: Oracle GenAI Professional, Google Cloud Computing Foundations, Introduction to FinOps & FOCUS

Transferable Skills: Collaboration, Communication, Creative Problem-Solving, Adaptability

PROJECTS

Room for One More - Unity, C#

Roguelike Survival Game

- Implemented enemy AI using NavMesh, state-based behavior, and adaptive difficulty.
- Developed combat logic, hit detection, player upgrades, and progression systems.
- Built shop and inventory mechanics that enhance the core gameplay loop.
- Optimized performance and gameplay flow for responsiveness and balance.

Michelin Stars From Another World - Game Programmer & Designer

2D RPG Game

- Contributed to the Game Design Document detailing systems, mechanics, and level structure.
- Assisted with level design, enemy placements, challenge balancing, and gameplay flow.
- Implemented movement and combat mechanics in C# along with enemy behaviors and progression pacing.

EDUCATION

California State University, San Bernardino

San Bernardino, CA

B.A. in Computer Systems – Game Development Concentration (Expected 2026)

- **Dean's List: Spring 2025**
- **Relevant Coursework:** Game Programming, Operating Systems, Software Engineering

Norco College

Norco, CA

A.S. in Game Development, Game Design, Game Programming (2023)

- **Dean's List: Fall 2021, Spring 2022**
- **Certificates:** Game Development • Game Design • Game Programming
